3 Requirements:

If you're using your own desktop PC, these two free downloads may help to indicate VR readiness:

HTC Vive & Oculus Rift - <http://store.steampowered.com/app/323910/>

But please note given the huge variety in PCs, it's hard to 100% guarantee your PC works with VR. Meeting these specs and passing the linked tests above means it's highly likely to work however.

What Else Do You Need?

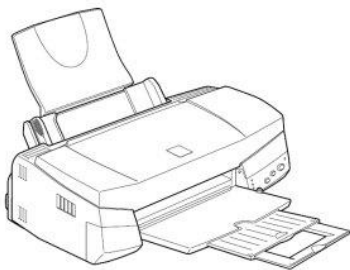

PS VR & HTC Vive require any standard headphones or earphones. The Rift has some built-in.

The Vive sensors have to be mounted up high (ideally 2 meters or higher, opposite each other, 5 meters apart or less), but we include clamps to attach them to anything flat up to 4cm thick. If you don't have anything to attach them to, we do rent light stands for \$10 + Shipping, which extend up to 2 meters max.

Renting a PC?

You do need a monitor that has HDMI, or Display Port if you have a display port cable.
